PPE SYSTEMS

BUILT FOR SAFETY

Our range of PortX products have been engineered to ensure maximum safety and efficiency where personnel lifting and fall arrest is required.

Aluminium Construction

Every system is built using strong, flexible anodised aluminium sections

Lightweight portability

All of our PPE systems are designed with features to maximise portable lifting

Specify to meet lifting challenges

Choice of size variants for each system to tailor the solution to specific needs

Certifications and conformity

All of our PPE systems are certified to a range of industry standards

Elite safety applications

Our safety range unlocks potential to solve industrial safety challenges throughout many industries

PORTX® TRIPOD

PPE SYSTEMS

The PortX Tripod is a compact, lightweight solution for confined space entry, compatible with our PortX winch and Rescue devices, it can be set up in seconds ready for up to two person confined space entry with the additional option of material lifting up to 500Kg.

Personnel Capacity	**140 kg**
Fall Arrest Capacity	**2 Users**
Materials Capacity	**500 kg**
Height of lift	**1464-2203**
Height increments	**8x 739mm**

KEY FEATURES

Rapid setup
Tool free winch bracket installation combined with an Integrated leg locking system ensures maximum productivity

Robust construction
High grade 6082 T6 Anodised Aluminum Construction, built for the toughest conditions.

Easy deployment
3 separate sheaves, allowing winch devices to be fitted on all leg's positions of the tripod, allowing multiple arrangements quickly and easily

Complete system
Combined with a PortX Winch or PortX Rescue to meet your specific personnel access requirements

Materials Lifting
Utilise the 3 lifting points in the head of the tripod with an appropriate lifting attachment

Compact and Portable
When folded, the PortX Tripod has a diametre of only 402mm and 1759mm length, allowing it to fit easily in to work vehicles

Adjustable
739mm of vertical adjustment in 8 positions give a range minimum height of lift of 1464mm for restricted areas, to 2203mm where clearance is critical

Increased stability
The articulated foot allows with built in ground spike and high grip foot pad allows confident positioning no matter the environment

Portable
System weight of just 19kg ensures the system can be transported and set up with ease

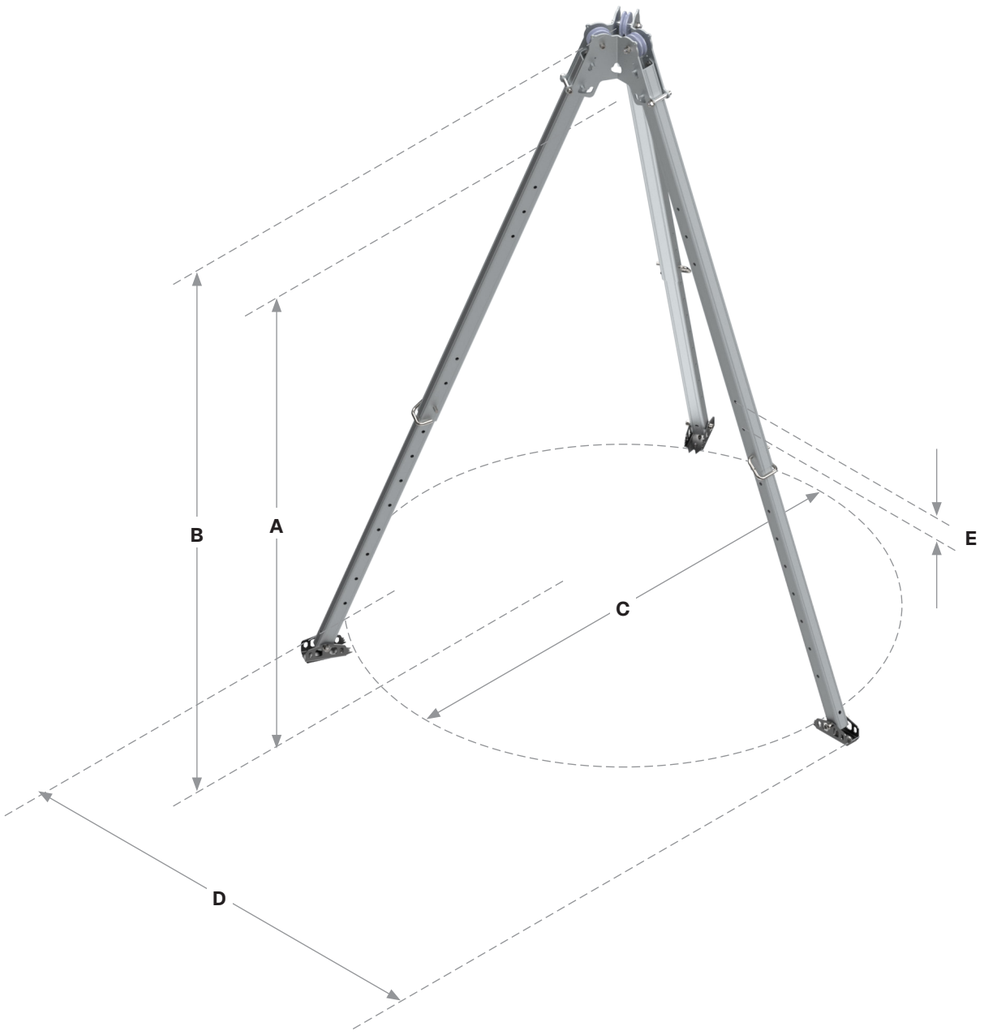

COMBINATION
Combine the PortX Tripod with the PortX Winch and Rescue to create a complete solution for confined space entry challenges.

CONFORMITY
- EN795:2012
- PD CEN / TS16415:2013
- OSHA
- ANSI Z359.18-17*

PORTX® POLE HOIST

PPE SYSTEMS

The PortX Pole Hoist has been designed specially for horziontal and vertical access. Pair with a Porta Gantry or Porta Gantry Rapide to create an offset winch position, increasing opportunities where access to the gantry is limied or attach to an existing anchor point for a seemless safety experience.

Personnel Capacity	**140 kg**
Fall Arrest Capacity	**1 User**
Materials Capacity	**500 kg**
Reach	**1571 mm - 3000 mm**

KEY FEATURES

Dual winch capability
Supports both a personnel winch and self-retracting lifeline for enhanced safety and operational flexibility

Ergonomic Design
Centrally mounted winches ensure balance is maintained easily during use

Lightweight construction
System weight of just 16kg it is easy to handle, position, and install

System compatibility
Integrates with the Porta Gantry and Porta Gantry Rapide to create a complete vertical access solution

Integrated carry strap
Enables safer, easier transportation in challenging environments

Optimised reach
3-position boom arm angle adjustment allows the reach angle to be optimised for different applications

Enhanced stability
Rubberised foor helps maintain control and keeps positioning consistent during operation

Precise positioning
360° rotational head enables the system to be used in restricted spaces, delivering smoother cable transition, reduced wear and improved user control

COMBINATION

Pair the Pole Hoist with either a Porta Gantry or Porta Gantry Rapide along with the PortX Winch and Rescue to create a fully portable solution for confined space and overhead anchor challenges.
