

DESCENDERS

INDY EVO PLUS

Evolution of the well-known Indy Evo descender, fitted with a new lever, easier to handle, that allows more fluid and precise working.

Indy Evo Plus is a manually operated descender device with double autolocking system, that locks both when the lever is released or when it is pressed. Indy Evo Plus is also a descender (conform to EN 12841 type C) for working on rope. It allows descent at a controlled speed, stopping at any time, hands free, on a static rope (EN 1891) or dynamic rope (EN 892). Light weight and compact size, long life guaranteed by the stainless steel cams and low maintenance make it a working tool very appreciated by the industry.

Certified for two people, it allows two people to lower at the same time and also allows the user to take in rope slack.

High quality product, made in Italy!

Usage activities

ROOF AND INCLINED PLANES	METAL STRUCTURES	ROPE ACCESS	CABLEWAY EVACUATION
CONFINED SPACES	SAILBOATS	TREECLIMBING / ARBORICULTURE	TACTICAL
