

# INDUSTRIAL FAN HEATER WITH DUCTING

MODEL NO'S: DEH2001, DEH3001, DEH5001 & DEH10001

Thank you for purchasing a Sealey product. Manufactured to a high standard, this product will, if used according to these instructions, and properly maintained, give you years of trouble free performance.

**IMPORTANT:** PLEASE READ THESE INSTRUCTIONS CAREFULLY. NOTE THE SAFE OPERATIONAL REQUIREMENTS, WARNINGS & CAUTIONS. USE THE PRODUCT CORRECTLY AND WITH CARE FOR THE PURPOSE FOR WHICH IT IS INTENDED. FAILURE TO DO SO MAY CAUSE DAMAGE AND/OR PERSONAL INJURY AND WILL INVALIDATE THE WARRANTY. KEEP THESE INSTRUCTIONS SAFE FOR FUTURE USE.

Refer to instructions

Electrical shock hazard

Hot surfaces

Do not cover

This product is only suitable for well insulated areas or occasional use.

## 1. SAFETY

### 1.1. ELECTRICAL SAFETY (DEH10001)

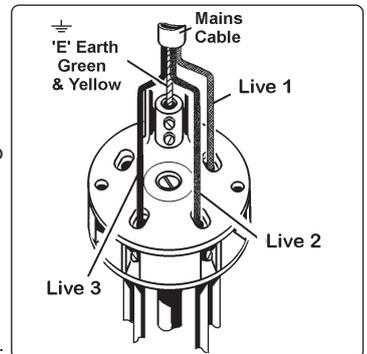

- ❑ **WARNING!** ELECTRICAL INSTALLATION OF THE HEATER TO A 3-PHASE 415VOLT SUPPLY MUST ONLY BE CARRIED OUT BY A QUALIFIED ELECTRICIAN.

Make sure the power supply cable is correctly connected to the earth. It is the user's responsibility to read, understand and comply with the following:

You must check all electrical equipment and appliances to ensure they are safe before using. You must inspect power supply leads, plugs and all electrical connections for wear and damage. You must ensure the risk of electric shock is minimised by the installation of appropriate safety devices. An RCCB (Residual Current Circuit Breaker) should be incorporated in the main distribution board. You must also read and understand the following instructions concerning electrical safety.

- ✓ The Electricity At Work Act 1989 requires all portable electrical appliances, if used on business premises, to be tested by a qualified electrician, using a Portable Appliance Tester (PAT), at least once a year.
- ✓ The Health & Safety at Work Act 1974 makes owners of electrical appliances responsible for the safe condition of the appliance and the safety of the appliance operator. If in any doubt about electrical safety, contact a qualified electrician.
- ✓ Ensure insulation on all cables and the product itself is safe before connecting to mains power supply.
- ✓ Ensure that cables are always protected against short circuit and overload.
- ✓ Regularly inspect power supply, leads, plugs and all electrical connections for wear and damage, especially power connections, to ensure that none are loose.
- ✓ Important: Ensure the voltage marked on the product is the same as the electrical power supply to be used. A three phase plug must be fitted to this machine.
- ✗ **DO NOT** pull the powered appliance by the power cable.
- ✗ **DO NOT** pull power plugs from sockets by the power cable.
- ✗ **DO NOT** use worn or damage leads, plugs or connections. Immediately replace or have repaired by a qualified electrician.
- ✓ This product must be fitted with a 3-phase plug according to the diagram, and will require a minimum supply of, 16Amps per phase for DEH3001 and DEH5001, and **32Amps for DEH10001**. You must contact a qualified electrician to ensure an appropriately fused supply is available. Connect GREEN/YELLOW wire to earth (E) terminal . Connect the live wires to live 1, 2 and 3.

When completed, check that there are no bare wires, that all wires have been connected correctly, that the cable external insulation extends beyond the cable restraint and that the restraint is tight.

### 1.2. ELECTRICAL SAFETY (DEH2001, DEH3001 & DEH5001)

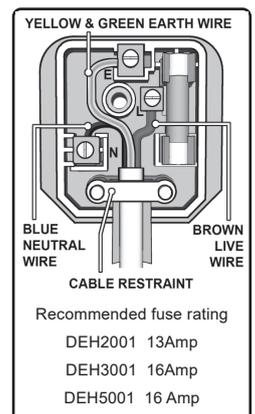

- ❑ **WARNING!** It is the user's responsibility to check the following:

Check all electrical equipment and appliances to ensure that they are safe before using. Inspect power supply leads, plugs and all electrical connections for wear and damage. Sealey recommend that an RCD (Residual Current Device) is used with all electrical products. You may obtain an RCD by contacting your local Sealey Stockist.

If the product is used in the course of business duties, it must be maintained in a safe condition and routinely PAT (Portable Appliance Test) tested.

**Electrical safety information, it is important that the following information is read and understood.**

- 1.2.1. Ensure that the insulation on all cables and on the appliance is safe before connecting it to the power supply.
- 1.2.2. Regularly inspect power supply cables and plugs for wear or damage and check all connections to ensure that they are secure.
- 1.2.3. **Important:** Ensure that the voltage rating on the appliance suits the power supply to be used and that the plug is fitted with the correct fuse - see fuse rating in these instructions.
  - ✗ **DO NOT** pull or carry the appliance by the power cable.
  - ✗ **DO NOT** pull the plug from the socket by the cable.
  - ✗ **DO NOT** use worn or damaged cables, plugs or connectors. Ensure that any faulty item is repaired or is replaced immediately by a qualified electrician.
- 1.2.4. This product is fitted with a BS1363/A 13 Amp 3 pin plug.

If the cable or plug is damaged during use, switch the electricity supply off and remove from use.  
 Ensure that repairs are carried out by a qualified electrician.  
 Replace a damaged plug with a BS1363/A 13 Amp 3 pin plug. If in doubt contact a qualified electrician.  
 a) Connect the GREEN/YELLOW earth wire to the earth terminal 'E'.  
 b) Connect the BROWN live wire to the live terminal 'L'.  
 c) Connect the BLUE neutral wire to the neutral terminal 'N'.  
 Ensure that the cable outer sheath extends inside the cable restraint and that the restraint is tight.  
 Sealey recommend that repairs are carried out by a qualified electrician.

### 1.3. GENERAL SAFETY

- WARNING!** Disconnect the heater from the mains power supply before carrying out any servicing or maintenance.
- ✓ Maintain the heater in good order and clean condition for best and safest performance. Replace or repair damaged parts.
- ✓ Locate heater in a suitable work area and keep area clean, tidy and free from unrelated materials. Ensure there is adequate lighting and keep the immediate area in front of the outlet grille clear.
- ✓ Allow the unit to cool before storage. When not in use, disconnect from the mains power supply and store in a safe, cool, dry, childproof area.
- ✓ Only use the heater standing in the upright position on a level surface.
- × **DO NOT** use the heater where there are flammable liquids, solids or gases such as petrol, solvents, aerosols etc, or where heat sensitive materials may be stored.
- × **DO NOT** place the heater near items that may be damaged by heat, allow at least 2mtr clearance in front of the heater.
- × **DO NOT** allow the heater to get wet as this may cause an electric shock, causing damage to the heater and possible personal injury.
- × **DO NOT** let power lead hang over an edge (i.e. table), or touch a hot surface, lie in the beam of heat, or run under a carpet.
- × **DO NOT** use in bathroom, shower room, or in any wet or damp environments or where there is high condensation.
- × **DO NOT** operate the heater when you are tired or under the influence of alcohol, drugs or intoxicating medication.
- × **DO NOT** insert or allow objects to enter any openings of heater as this may cause an electric shock, fire or damage to heater.
- × **DO NOT** use heater if the power cord, plug or the heater is damaged, or if the heater has become wet.
- × **DO NOT** use the heater for any purpose other than for which it is designed.
- × **DO NOT** use a timer or other remote device to operate the heater.
- × **DO NOT** allow children to touch or to operate the heater.
- × **DO NOT** site the heater below an electrical socket outlet.
- × **DO NOT** use the heater without the grille fitted.
- × **DO NOT** use the heater out of doors. These heaters are designed for indoor use only.
- × **DO NOT** cover heater when in use, and **DO NOT** obstruct the air inlet and outlet grilles.
- × **DO NOT** place heater too close to yourself or any object, allow the air to circulate freely.
- × **DO NOT** touch the outlet grille of the heater during and immediately after use as it will be hot.

### 1.4. OPERATIONAL PRECAUTIONS

- ✓ The heater must only be used by people who have read these instructions and have been trained in its use.
  - × **DO NOT** obstruct the air inlet and outlet sections of the heater.
  - × **DO NOT** cover the heater.
  - × **DO NOT** touch the heater casing or grille when first switched off, as these will be very hot and will take time to cool.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Children of less than 3 years should be kept away unless continuously supervised.
- Children aged from 3 years and less than 8 years shall only switch on/off the appliance provided that it has been placed or installed in its intended normal operating position and they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children aged from 3 years and less than 8 years shall not plug in, regulate and clean the appliance or perform user maintenance.
- CAUTION** some parts of this product can become very hot and cause burns. Particular attention has to be given where children and vulnerable people are present.

## 2. INTRODUCTION

Electric fan heaters with ducting for industrial applications. Model No. DEH2001 features one heat setting, Model Nos. DEH3001, DEH5001 and DEH10001 feature two heat settings. All units have thermostat control and fan only options. A totally dry heat with no condensation, no gas, no fumes and no smell. Ideal for workshops and garages. Model No. DEH2001 is supplied with 6m ducting hose, power cable and 3-pin plug. Model No DEH3001 is supplied with 6m ducting hose and power cable. DEH5001 is supplied with 6m ducting hose, 3ph power cable and 16A plug. DEH10001 is supplied with 6m ducting hose, 3ph power cable and 32A plug.

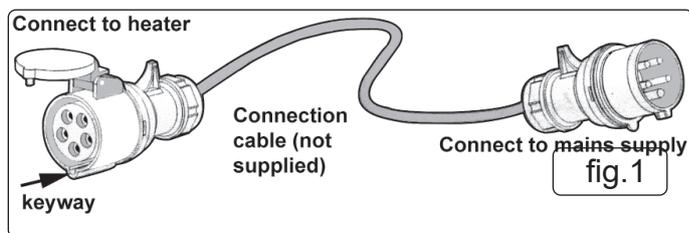

## 3. SPECIFICATION

|                              |                |                |                |                 |
|------------------------------|----------------|----------------|----------------|-----------------|
| <b>Model No:</b> .....       | <b>DEH2001</b> | <b>DEH3001</b> | <b>DEH5001</b> | <b>DEH10001</b> |
| <b>Power:</b> .....          | 2000W          | 1500/3000W     | 2500/5000W     | 5000/10000W     |
| <b>Supply:</b> .....         | 230V - 13A     | 230V - 16A     | 415V/3ph - 16A | 415V/3ph - 32A  |
| <b>Airflow rating:</b> ..... | 397m³/h        | 387m³/h        | 738m³/h        | 1063m³/h        |

## 4. CONNECTION (DEH10001)

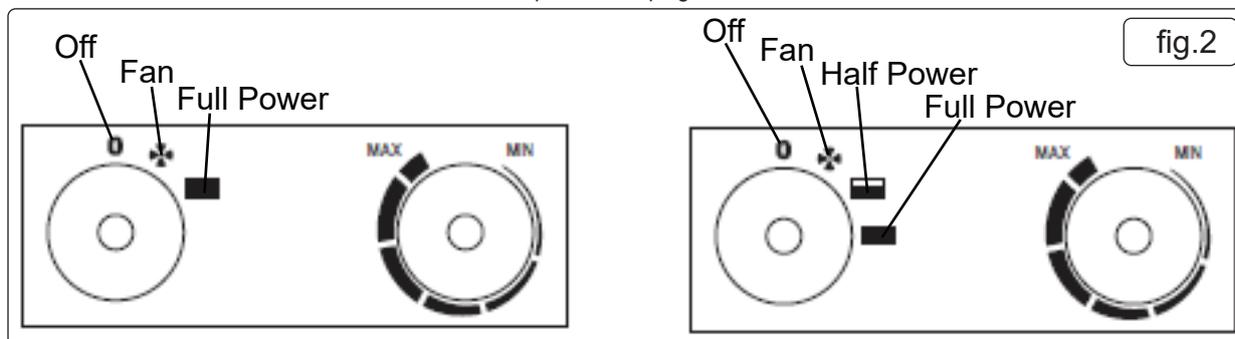

- 4.1. **CONNECTING DEH10001 TO MAINS SUPPLY** see fig.1
- 4.1.1. The DEH10001 heater is supplied with a protected 5 pin connector mounted on the side of the control housing. In order to connect to the mains it will be necessary to have the extension cable shown in fig.1 made up by a qualified electrician. (This connector is not supplied with the machine.) The cable should be no shorter than 1.8mtr and no longer than 3.0mtr.
- 4.1.2. Before connecting the DEH10001 to the mains ensure that the selector switch is set to OFF and the thermostat is set at minimum.
- 4.1.3. Hold open the protective cover on the socket connector on the extension lead as shown above and present it to the heater connector in the correct orientation so that the spigot on the heater connector passes into the keyway on the socket connector.

- 4.1.4. Push the socket connector fully home.  
Connect the other end of the extension cable to the mains supply.

## 5. OPERATION

- 5.1. Position the fan heater so that it stands upright on a firm surface and at a safe distance from wet environments and flammable objects.
  - ❑ **WARNING!** Always allow elements to cool before moving the units. Use only on a smooth even surface.
- 5.2. Connect the fan heater to the mains (see section 4 for DEH10001).
- 5.3. Set the thermostat knob to the MAX and let the heater operate at full power.
- 5.4. The fan heater will switch on when the heating selector is set to one of the power settings.
- 5.5. Once the room reaches the required temperature, the heating element will stop working but the fan will keep working. Once the room temperature goes below the set temperature, the heating element will start working. The fan heater will start and stop automatically keeping the room temperature constant.
- 5.6. Before switching off the heater, please turn the thermostat to MIN position and turn the switch to the fan position, let the appliance cool down for two minutes then turn off the heater and pull out the plug.

## 6. MAINTENANCE

- ❑ **WARNING!** Before cleaning the appliance, disconnect it from the mains and let it cool down.
- 6.1. The cover can easily get dirty, wipe it often with a soft cloth. To clean dirt off of the cover, wipe with a clean sponge dipped in <math><50^{\circ}\text{C}</math> water and mild detergent, then dry the heater cover with a clean cloth. Be careful not to let water enter the appliance.
    - ✗ **DO NOT** splash water onto the heater, never use solvent like gasoline etc. to clean the heater, in order to protect the cover.
  - 6.2. When you store the heater, let it cool down first, keep it dry. Then cover it with a plastic bag, put in a packing box and store it in a dry, ventilated place.

## 7. TROUBLESHOOTING

| Problem  | Possible cause                                  | Treatment  |
|--|---|--|
| The heater does not operate, even when it is plugged in and the switch and thermostat are switched on. | The plug is loose, or there is a bad connection | Pull out the plug, check the connection of the plug and socket.  |
|  | No power in socket outlet                       | Insert the plug in a proper socket   |
| The heating element is glowing   | The input voltage is too high or too low        | Use power supply according to the rating on the label  |
|  | The air inlet grill is blocked                  | Keep the heater away from articles like curtains, plastic bags, paper and other things that can cover the inlet or can easily cover the air inlet  |
| The appliance didn't heat up, or only the fan worked   | The switch was not turned to a heat setting     | Turn the switch to heat setting  |
|  | The thermostat operated                         | Turn the thermostat down wait for it to cool and then turn the thermostat up. If there is no click and the thermostat is not damaged, the heater will automatically switch on when the appliance has cooled down |
|  | The self-resetting cut-out operated             | Turn the heater off and inspect the blockage of inlet or outlet. Disconnect the plug and wait at least 10 minutes for the protection system to reset before attempting to restart the heater.                    |
| Abnormal noise   | The appliance is not stood upright              | Put the heater on a level surface  |

#### WEEE REGULATIONS

Dispose of this product at the end of its working life in compliance with the EU Directive on Waste Electrical and Electronic Equipment (WEEE). When the product is no longer required, it must be disposed of in an environmentally protective way. Contact your local solid waste authority for recycling information.

#### ENVIRONMENT PROTECTION

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.

**Note:** It is our policy to continually improve products and as such we reserve the right to alter data, specifications and component parts without prior notice.

**Important:** No Liability is accepted for incorrect use of this product.

**Warranty:** Guarantee is 12 months from purchase date, proof of which is required for any claim.

## Information requirements for electric local space heaters

| Model identifier(s): DEH10001,V1  |             |       |      |   |  |
|---|-------------|-------|------|---|--|
| Item  | Symbol      | Value | Unit | Item  | Unit                                       |
| <b>Heat output</b>  |             |       |      | <b>Type of heat input, for electric storage local space heaters only (select one)</b> |  |
| Nominal heat output   | $P_{nom}$   | 10.0  | kW   | Manual heat charge control, with integrated thermostat                                | Yes No <input checked="" type="checkbox"/> |
| Minimum heat output (indicative)*<br>* Enter figure or NA   | $P_{min}$   | 5.0   | kW   | Manual heat charge control with room and/or outdoor temperature feedback              | Yes No <input checked="" type="checkbox"/> |
| Maximum continuous heat output  | $P_{max,c}$ | 10.0  | kW   | Electronic heat charge control with room and/or outdoor temperature feedback          | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | Fan assisted heat output  | Yes No <input checked="" type="checkbox"/> |
| <b>Auxiliary electricity consumption</b>  |             |       |      | <b>Type of heat output/room temperature control (select one)</b>                      |  |
| At nominal heat output  | $el_{max}$  | N/A   | kW   | Single stage heat output and no room temperature control                              | Yes No <input checked="" type="checkbox"/> |
| At minimum heat output  | $el_{min}$  | N/A   | kW   | Two or more manual stages, no room temperature control                                | Yes No <input checked="" type="checkbox"/> |
| In standby mode   | $el_{SB}$   | N/A   | kW   | With mechanic thermostat room temperature control                                     | Yes <input checked="" type="checkbox"/> No |
|   |             |       |      | With electronic room temperature control  | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | Electronic room temperature control plus day timer                                    | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | Electronic room temperature control plus week timer                                   | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | <b>Other control options (multiple selections possible)</b>                           |  |
|   |             |       |      | Room temperature control, with presence detection                                     | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | Room temperature control, with open window detection                                  | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | With distance control option  | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | With adaptive start control   | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | With working time limitation  | Yes No <input checked="" type="checkbox"/> |
|   |             |       |      | With black bulb sensor  | Yes No <input checked="" type="checkbox"/> |
