

• In addition to routine checks for each use, PPE should regularly undergo a detailed inspection by a competent person. Petzl recommends an inspection every 12 months and after any exceptional event in the life of the product.  
 • PPE inspection should be conducted with the manufacturer's Instructions for Use.  
 Download the instructions at [PETZL.COM](http://PETZL.COM).

## RIGGING EQUIPMENT

### User information

Surname

Address

Identifier

### PPE information

Model

Serial number

Year of manufacture

Date of purchase

Date of first use

**Manufacturer:** Petzl, ZI Cidex 105A - 38920 Croles - France

				N/A
Good condition (G)	To monitor (TM)	To repair (TR)	Do not use, retire (R)	Not applicable

### 1. Known product history

Usage conditions or exceptional event during use (examples: fall or fall arrest, use or storage at extreme temperatures, modification outside manufacturer's facilities...):

				N/A
---	---	---	---	-----

### 2. Preliminary observations

Verify the presence and legibility of the serial number and the CE mark.  
 Verify that the product lifetime has not been exceeded.  
 Compare with a new device to verify there are no modifications or missing elements.

### 3. Checking the general condition

- Check the general condition of the product (marks, deformation, cracks, corrosion...).
- On the SWIVEL, verify the condition of the rivet (marks, deformation, cracks, corrosion, absence of play...).

### 4. Checking the attachment holes

- Check the condition of the attachment holes (marks, deformation, cracks, corrosion...).

### 5. Function check

- For the SWIVEL, verify that the two parts turn freely relative to each other.

**Comments (detail here any defects found on the product and accomplished tasks)**
