

GOLDEN TOP PLUS

FULL BODY HARNESS

Ref. 092121 ROPE ACCESS, TOWERS/INDUSTRY, ROOFS

Our best-selling full body harness for suspension and work positioning activities. The Golden Top Plus offers all of the functionality of our most advanced rope access harness models in a minimalist, cost effective package.

Ventral attachment features two loops: the upper loop is for attaching a chest harness and chest ascender and the lower loop holds the ventral D-ring for attaching lanyards and rope tools. Equipped with a keeper strap for securing a chest ascender in a streamlined way. STS automatic buckles on the leg loops.

5 steel attachment points: 1 sternal and 1 dorsal for fall arrest, 1 ventral for suspension and 2 side for positioning and restraint. Equipped with NFC TRACK tag for digital identification.

2 sizes.

NEW: equipped with the compact auto-locking Nexum carabiner for the connection between the sit and chest parts of the harness. The Nexum is notable for its low profile with a shortened height that does not hit the sternum like fullsize carabiners, as well as its clean closure and smooth 3Lock opening and closing action. The anti-rotation pin can be removed in order to capture the Turbochest ascender.

NEXUM

Technical information for our new suspension harness carabiner

The Nexum is an innovative carabiner designed specifically for suspension harnesses.

It has been specially developed for a very clean interface with the specific width of the webbing and is notable for its low profile with a shortened height that does not hit the sternum like full-size carabiners, as well as its clean closure and smooth 3Lock opening and closing action. The anti-rotation pin can be removed in order to capture the Turbochest ascender.

Lightweight aluminum alloy construction (62 g) with a breaking strength of 20 kN.

WARNING: The Nexum is intended for use as an attachment between the sit and chest parts on certified harnesses for working at height. It cannot be removed and used for other purposes.

- Trapezoidal shape

- Breaking load > 20 kN
- Aluminum alloy body and gate
- Ultra compact
- 3Lock auto-locking gate
- Keylock closure

- 2 mm Allen key (not supplied)
- M4 screw
- Stainless steel anti-rotation pin, d.3 mm

NFC Track | G.T.S.

C.A.M.P. presents in this catalog a complete solution for the digital management of PPE, both for allocation to users and for periodic inspections: the NFC TRACK hardware tags on the products work seamlessly with the G.T.S. - Gear Tracking System software to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products.

They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

ENFC ∭ ETRACK

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID** (High Frequency Radio Frequency Identification) communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

- G.T.S.- GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app (campgts.it).

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.
